

Fiber cleaver blade

Description

World have adopt its own unique process and technology of production diamond scribing wheels to manufacture this cleaver blade.

The tungsten alloy of World's cleaver blades are selected from well-known international manufacturers, which characterizes a high precision of cutting, smooth cutting face, cutting angle precise and long service life.

Whether quality or service life, it can be comparable to similar products produced in other leading companies.

Specification:

Specifications: OD20.0*ID4.0*3.0*60°

Item: SCT-21b

Blade positions: 12/16

Blade life: 36000—40000 fibers (1,000 fibers x 3 height x 12/16 positions)

Cleaving angle: 0.5 degrees at single fiber
